Most airlines are giving the ability to change without a fare difference by a certain date. Check with the airline or tour operator if your client wants to change: You must have proof of the test results for the airline, so we recommend you get them printed in addition to having them on your mobile device should there be a problem with your device. American Airlines now has an app to let you upload in advance your test results.

Even if someone has received the vaccine, they must be tested.

US Territories are exempt (i.e. Puerto Rico and US Virgin Islands, etc.)

Note that these resort groups cover the majority of resorts we work with throughout Mexico and the Caribbean (and some in other international destinations), but we strongly recommended that you confirm with the hotel / resort the exact policy to share with your client and receive the policy in writing if you can. The information and links above are for your reference purposes only. If your client's hotel/resort is not listed, check with the government tourism office for local testing locations, or with the hotel directly. Note also, many hotel/resort groups are offering free insurance, but purchasing insurance is also highly recommended.
